510(k) SUMMARY

Contact Person: Judy English
Date Prepared: December 22, 1995

Trade Name: Cannulated PLUS™ Hip Screw (Sterile)
Common Name: Hip Bone Screw
Classification: II
Predicate Device: Cannulated PLUS™ Hip Screw

This summary of 510(k) safety and effectiveness information is being submitted in accordance with the requirements of 21 CFR §807.92.

Description/Intended Use

The Cannulated PLUS™ Hip Screw (Sterile) is a cannulated bone screw. An optional beveled washer is available for use with osteoporotic bone. The device is available in a range of sizes to fit varying anatomical requirements.

The Cannulated PLUS™ Hip Screw (Sterile) is intended to be used in the fixation of cancellous bone, for treatment of conditions such as, but not limited to:

1. femoral neck fractures;
2. arthrodesis of the hip;
3. femoral condyle fractures;
4. tibial plateau fractures;
5. ankle malleolar fractures; or
6. elbow fractures

Material

The Cannulated PLUS™ Hip Screw (Sterile) is manufactured from stainless steel. The optional washer is also manufactured from stainless steel.
